PROJECTS

- **Online Education system:** (HTML, CSS, JS)

The main objective of the project was to provide a comprehensive understanding of programming languages to users by offering instructional videos on our website. (2020)

- **Labour Service:** (React, Ionic)

The application is designed to offer round-the-clock services to customers. We utilized Firebase as our back-end platform, enabling customers to provide feedback on the performance of our workers. (2022)

- **Hospital Management System:** (HTML, CSS, JS)

I have developed a user-friendly web application that enables patients to schedule appointments with their doctors and check for available hospital beds effortlessly. (2021)
