SUMMARY

Results-driven **Frontend Developer** specializing in **React, Redux Toolkit, and Firebase**, with experience building high-performance, accessible, and responsive web applications. Proven track record of **improving user retention by 15%**, **optimizing LCP from 3.8s to 2.1s**, and delivering real-time data synchronization. Passionate about crafting intuitive UIs that balance performance, accessibility (WCAG 2.1), and design precision.

EXPERIENCE

- **Open Source Contributor**
  Community Contributor   *Aug 2023 – Present*
  - **LinksHub:** Improved accessibility (WCAG 2.1) and fixed 10+ UI bugs during **Hacktoberfest 2023**, enhancing usability for 500+ monthly users.
  - **AI-Fusion:** Enhanced UI/UX using TypeScript, optimized dark mode, and implemented card sorting, improving navigation speed by 25%.
  - **Namespace:** Improved responsiveness, fixed navigation issues, and enhanced mobile experience.
  - **Code-Magic:** Fixed responsive gradient backgrounds for small screens, ensuring consistent rendering.
  - **React-native-authkit:** Created comprehensive README for RTK Query Auth Template, boosting developer onboarding speed.

PROJECTS

- **ShopVerse:** Implemented authentication (email/password + Google) and real-time Firestore sync. Developed wallet, rewards, and orders modules, **boosting user retention by 15%**. Optimized Core Web Vitals by reducing LCP from 3.8s to 2.1s.
- **Periodic Table:** Built a responsive React platform with advanced search and filtering for chemical elements, improving learning efficiency for students and researchers.
- **MedGuide:** Adapted an ML-powered diagnostic tool into a clinician-friendly interface, improving diagnostic accuracy by 20% and enabling real-time symptom input via Flask UI.
- **LabourServices:** Developed a job-matching app using Ionic + React, connecting 50+ workers with customers. Integrated real-time feedback and ratings to ensure service quality.
- **Hospital Management System:** Built a Python-based hospital system handling appointments, billing, and patient management. Improved efficiency by 40% through optimized workflows.

SKILLS

- **Frontend:** ReactJS, Redux Toolkit, React Router, Vite, Tailwind CSS, HTML5, CSS3, Framer Motion
- **Languages:** JavaScript (ES6+), Typescript, Python
- **Backend/Cloud:** Firebase (Auth, Firestore, Storage, Cloud Functions), RESTful API, Node.js (basics)
- **State Management:** Redux, Redux Toolkit, Context API
- **Tools:** Git, GitHub, Figma, VS Code, Axios
- **Concepts:** Accessibility (WCAG 2.1), Core Web Vitals, Performance Optimization

EDUCATION

- **Atharva College of Engineering**   Mumbai, India
  *B.E. Computer Science; GPA: **9.06***   *Jan 2021 – May 2024*

ACHIEVEMENTS & CONTRIBUTIONS

- **AI-Driven Healthcare Application – ICSTEMSD2024:** Developed a symptom analysis and medication engine with vital monitoring for personalized dietary recommendations.
- **Best Project of the Session:** Awarded at Projectathon 2.0 (National Level Competition)
- **Projectathon Volunteer:** Coordinated participants and managed event operations for 100+ attendees in a national-level competition.
